

- 01 **Long Distance:** Talk to Hunter controllers up to two miles away
- 02 **Rugged:** Roam XL is built with the most demanding job sites in mind
- 03 **Saves Time:** Complete a wide array of tasks without physically visiting the controller

ROAM XL LONG DISTANCE REMOTE

Long Range Remote Built Contractor Tough

Large-scale sites such as shopping centers, industrial complexes, college campuses, and multi-unit housing complexes require high-powered remotes that can cover long distances. The new Roam XL long distance remote is a powerhouse in a small package. It features a simple user interface with 128 different programmable addresses. It also boasts a signal strong enough to go through buildings and still communicate with your Hunter controller from up to two miles away in the line of site. The compact, high-powered remote is a single unit that can be carried from job to job and used to remotely access Hunter controllers that are SmartPort® capable. The Roam XL eliminates the need to walk to the controller to start or stop a cycle during maintenance, installation or winterization.

Purchase the new Roam XL, and experience the increased efficiency and flexibility it offers your business.

ROAM XL FEATURES & SPECIFICATIONS

Model

Long Distance Remote for commercial applications.

ROAM XL
(w/o antenna)
Height: 6¼"
Width: 3"
Depth: 1¼"

Specifying Options

Hunter remotes require the installation of a SmartPort wiring harness*.

SMARTPORT®

The SmartPort is a connector that is wired to the terminals on the controller, and allows quick connection to any Hunter remote.

* ACC and I-Core controllers include pre-wired SmartPorts for remote operation.

WALLMOUNT BRACKET FOR SMARTPORT
